1 <sup>st</sup> Insemination	\$290
2 <sup>nd</sup> Insemination	\$190
Subsequent Inseminations	no charge

Transcervical Insemination (includes consult and ovulation timing): up to \$1700

Surgical Insemination (includes consult and ovulation timing): up to \$2700

Boarding Fee per day (included if boarding for breeding) \$40

## Statement on Breeding:

- your bitch may not get pregnant - when all parameters are normal, we still expect about 15-20% of bitches will not conceive
- your bitch may become pregnant and may have any litter size from 1 pup to many
- a singleton pup, and also large litter size, can cause problems at birth and may require special management so ultrasonography at 4 weeks of gestation to count pup numbers is essential
- between 5 and 10% of bitches have trouble delivering pups, therefore it is essential that she has a veterinary examination just prior to delivery; for imaging (X-Ray) to count final pup numbers and to discuss possible intervention parameters

## Consent to Services:

*I am the owner or owner's agent of the pet named here. I recognise that the estimate given pertains to the breeding procedure for which my bitch was presented, and treatment for additional conditions may incur additional costs. I hereby authorise and give permission for procedures and treatment to be performed by a registered veterinarian. I understand the risks involved with sedation and anaesthesia. I hereby certify that I fully understand the services to be provided and the costs of these services. I assume financial responsibility for all charges incurred and I agree to pay the costs in full at the time of discharge .*
